

Handing Over Guide

We host several apps, for both mobile and web.

Overall note: All code other than WordPress exists on GitHub under the **rightintellectual** email, which is available in the "**Access Codes**" doc. All backend services exist on **Render**. All mobile apps are hosted on **Expo**. Frontend apps exist on **Render** and **Next.js**. Installation guides for local development for all assets are linked in the installation guide in every repo. You can access environment variables from **Render**, and mobile app frontend environment variables from **Expo**.

Shared operations

- **Emails:** Create and manage all project emails in the **Bluehost** email panels.
- **Domains:** All domains are configured in **aeserver**.
- **Payments:** All payments are connected to **Stripe**.
- **Environment variables:** All env variables for hosted backends are kept on **Render**.
- **Databases:** All databases exist on **Bluehost**.
- **Passwords / access codes:** Available via the **rightintellectual** email account — open the Google Docs file named "**Access Codes**".

1. PhD Success

Website: <https://phdsuccess.ae>

WordPress site hosted on [Bluehost](#).

Part	Where it lives	Hosted on
Website	WordPress	phdsuccess.ae (Bluehost)

2. Coach Academ

Repository: <https://github.com/Rise-admin1/StudentMobileRN>

Local setup and production release steps are in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	<code>client/</code>	Expo
Backend	API (<code>api/</code>)	Render
Landing page	Next.js (<code>nextjs-web-landing/</code>)	Vercel

3. Scientific Journals Portal

Repository: https://github.com/Rise-admin1/React_Journal

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Vite (<code>client/</code>)	Render
Backend	API (<code>api/</code>)	Render

4. Dubai Analytica

Repository: <https://github.com/Rise-admin1/AnalyticaForm>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Vite (<code>client/</code>)	dubaianalytica.com
Backend	API (<code>api/</code>)	survey.dubaianalytica.com
DRI page	Vite (<code>dri-page/</code>)	dri.phdsuccess.ae

5. Safaribooks

Repository: <https://github.com/Rise-admin1/safari-books>

Local setup and production release steps are in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	<code>client/</code>	Expo
Backend	API (<code>api/</code>)	backend.safbooks.com
Landing page	Vite (<code>SB-landing_page/</code>)	landing-page

6. Velo

Repository: <https://github.com/Rise-admin1/Velo>

Local setup and production release steps are in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Expo (<code>velo-client/</code>)	Expo
Backend	API (<code>api/</code>)	Render
Landing page	Next.js (<code>nextjs-velo-landing/</code>)	velointl.com

7. Funyula

Repository: <https://github.com/Rise-admin1/mch-mp>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Next.js (<code>client/</code>)	funyula.com
Backend	API (<code>backend/</code>)	backend on render
PHD Success scheduling	Vite (<code>phd-success-scheduling/</code>)	scheduling.phdsuccess.ae
Rise scheduling	Vite (<code>rise-scheduling/</code>)	on render
PDF React	Vite (<code>pdf-react/</code>)	pdf on render

8. RISE Home

Repository: <https://github.com/Rise-admin1/rise-home>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Vite (<code>client/</code>)	rightintellectual.com (Render)

9. Researchers Hub

Repository: <https://github.com/Rise-admin1/researchershub>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Static HTML redirect	<code>index.html</code> (also <code>html/index.html</code>)	Render → redirects to writeright.ae

10. Samia Future

Repository: <https://github.com/Rise-admin1/samia-future>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Next.js (repo root)	samiafuture.com (Vercel)

11. MTCM Foundation

Repository: <https://github.com/Rise-admin1/MTCM-Foundation>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Next.js (repo root)	mtcmfoundation.org (Vercel)

12. Corpink

Repository: <https://github.com/Rise-admin1/corpink>

Local setup is in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Next.js (repo root)	corpink.ae (Vercel)

13. RISE Reports

Repository: <https://github.com/Rise-admin1/rise-reports>

Local setup and production release steps are in [INSTALLATION.md](#).

Part	Where it lives	Hosted on
Client	Expo (fe-reports-expo/)	Expo / App Store
Backend	API (rise-reports-api/)	Render
Vault	External (not in this repo; app calls Funyula directly, not proxied by the BFF)	future.funyula.com
